

Ralph Dyakugha

Windhoek, Namibia | [linkedin](#) | [github.com](#)

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in full-stack web development, VR application development, RESTful API integration, and technical documentation. Skilled in JavaScript, React.js, Node.js, Python, C#, MongoDB, and SQL. Additional background in Unity-based VR development, responsive UI design, and usability testing. Brings a strong combination of technical and creative digital skills.

WORK EXPERIENCE

VR Development Intern · Aalborg University, Denmark · Sep 2025 – Jan 2026

- Developed an immersive VR application in Unity 6, covering user research, storyboarding, and full technical implementation.
- Engineered interactive systems including hand-tracked mechanics, scene transitions, and event-driven narration triggers.
- Implemented reusable UI transition systems and environment-state logic for spatial consistency across room-scale VR.
- Conducted iterative usability testing, refining interaction clarity, audio balance, and performance.

Junior Software Developer (Intern) · G-Mobility Investment Technology Cc · Jun 2023 – May 2024

- Developed and deployed dynamic web applications using React.js, Node.js, and MongoDB.
- Provided technical troubleshooting and user support, diagnosing and resolving system and application issues.
- Created comprehensive technical documentation that improved team onboarding efficiency and knowledge transfer.
- Led client interviews and requirement-gathering sessions, translating business needs into actionable development plans.
- Performed system testing and optimisation across multiple environments, contributing to QA and performance improvements.

EDUCATION

Bachelor's + Honours in Computer Science
Specialisation: Software Development
Namibia University of Science and Technology
(NUST)

Diploma in Real-Time Computer Graphics
Aalborg University, Denmark

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, C#, HTML5, CSS3

Frameworks: React.js, Node.js (Express), Unity (VR)

Databases: MongoDB, SQL

Dev Tools: Git & GitHub, Docker, Postman

Web: RESTful APIs, JSON & HTTP, Responsive UI

Other: Technical Writing, Usability Testing, Canva

LANGUAGES

English — Native
German — Beginner

Afrikaans — Intermediate
Rukwangali — Beginner
